

Windows 7

To Lengthen the time before your display goes to screen saver

Right click on your desktop>Personalize

Choose Screen Saver in the lower right corner

Change the length of time before your display goes to Screen Saver.

*Also, uncheck On resume, display logon screen

Select **Change Power Settings**

Balanced (recommended)

Automatically balances performance with energy consumption on capable hardware.

[Change plan settings](#)

Next click on Change Plan Settings and extend both the Turn off Display and Put Computer to Sleep times. For security purposes please don't extend it too far.
